

Summit Learning Centre Offers First Online French Immersion Course for Grade 10 students.

Always wanting to be at the leading edge of new technology and learning opportunities, Summit Learning Centre has brought forward an exciting new choice for Gr. 10 French Immersion students.

Teacher Sonya Woloshen will be instructing Science 10 in French Immersion online, the first time this has been done provincially. The course was created from the ground up by Sonya, who describes herself as a digital teacher. She recently made it a personal goal to have a paperless semester in her face-to-face classroom, an initiative that has proven successful.

Sonya has seen that her students are comfortable with technology, but many don't know how to use it efficiently. "I like to just keep pushing the limits and help students get those 21st century skills," she enthused.

One of the key benefits for students is that taking this course online will free up a block in their school schedule, said Summit principal Cathy Anderson. "This provides more flexibility when students are choosing electives at their neighbourhood school." Summit Learning Centre is able to offer this course to any Gr. 10 French Immersion student in B.C., and students may work on the course whenever it best fits their schedule. Summit Learning Centre is excited to be expanding online options for French Immersion students with this engaging new course!
