

MATH CONSIDERATIONS

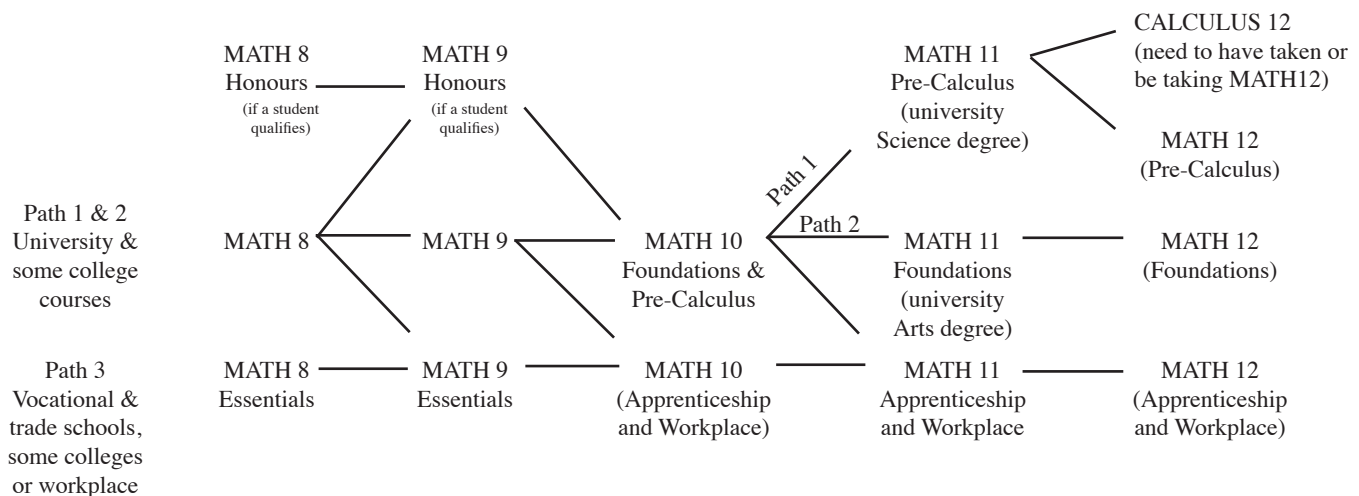

It's important to make an informed decision when selecting your math course for next year. The Ministry of Education has made some changes to the math steams province-wide. If you are in any doubt, speak to your counsellor or check the website of the further education institutions you may be considering in the future.

Important Note:

For specific program requirements, you should contact the specific institution you are interested in or search for specific program requirements using Education Planner's web site: <http://www.educationplanner.ca> Update your information often, as changes may occur. See your counsellor if you have questions.

SAMPLE FUTURE PLANS		MOST RELEVANT COURSE
Technical college Trade School Direct entry into workforce		Apprenticeship and Workplace Mathematics 10 - 12
Commerce Math	Engineering Medicine	Foundations of Mathematics and Pre-Calculus 10 <i>Followed by Pre-Calculus 11 and 12</i>
Fine arts Social sciences	Humanities Undecided	Foundations of Mathematics and Pre-Calculus 10 <i>Followed by Foundations 11 and 12</i>

MATH PATHWAYS - prerequisites needed to get into a course at the next level

* Apprenticeship and Workplace Math 12 will probably not be offered at secondary schools in SD42 for the 2012/13 school year. It will likely be offered at the District level however precise details are not available at this time.
